1. Important Notice

1.1 Important Notice Prior to Operation

Please carefully read this manual prior to operating the product. For those who don't follow the installation notices, we should not take any responsibilities for damage, accident or injury.

- ◆ Don't disassemble or modify this product by yourself. Because our products are designed with the structural calculation, computer simulation and physical test, they can't be disassembled or modified without engineer's permission. If the accident or loss is caused by the disassembly or modification, we should not take responsibility.
- ◆ Before this product is installed or operated, please check the appearance. If there are any damages, please immediately contact us or an agent.
- ◆ Please carefully read the product label or the specifications on the shipment document prior to the operation; and indeed install it according to the installation description.
- ◆ Please read the specifications and the power supply on the label before operating this product, and confirm the power supply complies with the requirements. If the product damage or the person injury is caused by the incorrect power, we should not take responsibility.
- ◆ Don't operate this product over the rated load. If there is the loss or damage, we should not take responsibility.
- ◆ Don't operate this product under the impact environment. If there is failure, accident or injury, we should not take responsibility.
- ◆ Don't handle this product by yourself if it fails. It must be repaired by the qualified technician only.

1.2 Safety Notice

- ◆ Please carefully read this manual prior to the installation, transportation, maintenance or check, and correctly operate the product.
- ◆ A user must be familiar with electric knowledge, safety information and all notices prior to the operation.

<p>◆ Notice</p>	<p>When the power is connected, there is electric shock if you touch the terminal and inside.</p> <p>Don't scratch the cables or put heavy objects on them.</p> <p>Don't clip the cable between two objects to cause electric shock or a fire.</p>
<p>◆ Transportation</p>	<p>Please pay attention during the transportation. Otherwise, the product will be damaged.</p> <p>Pay attention to the transportation method because the box can't suffer from the excessive force.</p> <p>Don't stack each other to collapse.</p>
<p>◆ Setup Place</p>	<p>Don't set up a place with high temperature and moisture, or dust, iron and cutting powder.</p> <p>Please set up at a place in the range of temperature where complies with the manual. If the high temperature exists, please install a cooling fan.</p> <p>Don't set up at a place with direct sunlight.</p> <p>The product has no waterproof structure. Don't operate it outdoors or at the place where there is water or other liquid.</p> <p>Please set up a place with less vibration.</p> <p>When a motor is continuously operated, heat will be generated due to the operating frequency. Please cool down with a fan.</p> <p>Please select the stand-by status when a motor stops, so that the ambient temperature will not exceed the regulations.</p>
<p>◆ Installation</p>	<p>Don't put the heavy object on the product to avoid injury.</p> <p>There is a fire when the objects are put into the product.</p> <p>Please observe the installation steps. Otherwise, there is a fire.</p> <p>Please prevent the failure or injury from the strong impact.</p> <p>The body weight must be taken into account when it is installed. The improper installation will cause damage or injury.</p> <p>The product is installed on the nonflammable objects. Otherwise, there is a fire.</p>

◆ Connection	Please select the wires with reliable ground. Otherwise, a motor will be out of control or burned to cause injury or a fire.
◆ Operation and Transportation	Please confirm the power specification is correct. Otherwise, it will cause injury or a fire. After the power supply is instantaneously recovered, the sudden operation could take place. Don't get close to the machine. There is an external emergency circuit, so that can immediately stop and disconnect the power.
◆ Maintenance	Don't disassemble or modify the product by yourself. Don't handle the product if it fails. Please repair it by our engineer.

2. Control Panel

2.1. Interface Description

No.	Interface	Description
1	Main Power	Main power of control panel (light up in white when activating)
2	PS2	Provide the communication protocol at customer side (support mouse and keyboard)
3	USB	USB(2.0)
4	LAN	Ethernet
5	Output	Used by customer
6	Input	Used by customer
7	Robot IO	Connect to the Robot
8	VGA	For Teaching Pendant
9	COM1	For Teaching Pendant
10	COM2	Modbus
11	COM3	For Teaching Pendant
12	EMO	Emergency stop switch (including cables)
13	Motor Connector	Connect to the Robot
14	Power In	Power connector for control panel, 1P AC200~240V 50/60Hz for power input
15	SV 01~04	For repair (※required for professional operator)
